

WR & Slips Mobile Application Documentation

1. Project Overview

The WR & Slips application is a Flutter-based mobile application for accessing WR-related documents, PDFs, circulars and slips. It supports two roles: User and Admin.

2. Objectives

Provide easy access to documents, organize them into categories, allow reading/downloading PDFs, and let administrators manage content.

3. Technology Stack

Frontend: Flutter (Dart)

Backend: Spring Boot or Node.js/Express (recommended)

Database: PostgreSQL

File Storage: Cloudinary / Supabase Storage / AWS S3

4. User Roles

User: Register/Login, Select Zone, View Categories, Read & Download PDFs, View Slips.

Admin: Login, Upload/Edit/Rename/Delete PDFs & Slips, Manage Categories.

5. Application Flow

Splash → Login/Register → Select Role → User(Admin) Flow.

8. Database

Users: id, name, email, password, role, zone, created_at.

Documents: id, title, category, zone, pdf_url, slip_url, uploaded_by, created_at, updated_at.

9. Functional Requirements

Users can register, login, select zone, browse categories, read/download PDFs and view slips. Admins can add, edit, rename and delete documents.

10. Non-Functional Requirements

Responsive UI, secure authentication, clean UI, scalable architecture.

11. Folder Structure

```
wr_slips/  
■■■ frontend/ (Flutter)  
■■■ backend/ (Spring Boot/Express)  
■■■ database/  
■■■ docs/
```

12. Future Enhancements

Search, Bookmarks, Recently Viewed, Push Notifications, Offline Downloads, Dark Mode, Analytics.

13. Expected Outcome

A centralized platform for users to access documents while administrators securely manage content.
